**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Allowable Subject Matter***

2. Claims 1-4 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The present invention provides an image sensor, simple in structure and capable of ultrahigh-speed image capturing based on the FT-CCD image sensor (specification, page 15, paragraph 3), and this image capturing apparatus enables high-performance continuous image capturing (specification, page 19, second paragraph).

Particularly, the new image sensor comprises the following features, which the prior art taken either singly or in combination does not teach:

- wherein a charge corresponding to an intensity of the incident ray is generated at the element of the charge transfer path corresponding to each window, and the generated charge is transferred on the charge transfer path by voltages applied from the charge transfer electrodes; and wherein each of the charge transfer electrodes has a larger size in a charge transfer direction at portions corresponding to the windows than that at portions covered with the intercepting film (see independent claim 1).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
